Forecast for Monday 29 May 2023

Weather: The fine and dry weather is set to continue, once any patches of cloud across the slopes clear after the sun rises. Plenty of sunshine through the morning, however this will turn hazy for the afternoon as high cloud builds. Staying dry, but feeling cool across the tops with a fresh breeze.

Chance of cloud-free hill tops above 600m: 90% at first, increasing to near 100% during the early morning.

Low cloud and visibility: Isolated cloud patches obscuring tops above 500m in the east at first. Soon lifting with all cloud above summit level and bringing very good views of distant peaks.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite the high cloud, UV levels will remain Moderate to High, with appropriate sun protection required. Some extra layers recommended as the tops will be feeling chilly early and late, especially in the breeze.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 30 May 2023

Weather: A risk of some patchy cloud across easter slopes through the early hours, this lifting and breaking quickly, leaving another fine and dry day with plenty of sunshine. Feeling slightly warmer than Monday.

Maximum wind: Easterly or northeasterly winds 15-20mph, gusting 25-30mph.

Chance of cloud-free hill tops 600m: Greater than 95%.

Low cloud and visibility: Some patchy cloud above 500m first thing, soon lifting and breaking. Generally excellent visibility.

Temperature: **Valleys:** Plus 3 Celsius rising to plus 21 Celsius.
At 600m: Plus 6 Celsius rising to plus 12 Celsius.
Freezing level: Well above summits.
